## Skills

Programming Languages: Typescript, Javascript (proficient). GO, Python (knowledge)

Frameworks: NextJs, Expo, ExpressJs, HonoJS (proficient). NestJS, Gin (knowledge)

Databases: MySql,Postgres(proficient). MongoDb (knowledge)

Version Control: Git, GitHub

Other Tools & Technologies: Docker, OAuth, JWT, Rest Framework, Linux Terminal, AWS, Digital Ocean, Vultr, Heroku (cloud technologies)

## Quelites

▪ Passion for coding

▪ Self learning capability

▪ Team work

▪ Hard work

## Education

| 2021-Now | **B.Sc in Computer Science and Engineering** Varendra University,Rajshahi Final Project: Full stack Gym Management system |
|---|---|

## Experience

| 2021-2023 | **Front end developer at Xemiron IT Solutions** Vodra, Rajshahi |
|---|---|
| 2023-Now | **Junior full stack developer at Global Community Organization** Bagha, Rajshahi |

## Courses

| 2022 | **Think in a Redux way Course** React Redux,Redux toolkit 89.29% marks obtained - Report |
|---|---|
| 2022 | **Reactive Accelerator** React Advanced, Next js, Mongo db 85.15% marks obtained - Report |
| 2025 | **Job Roles in the Cloud & Cloud Essentials Knowledge** A+ Link |

## A few word about myself

I am a self-taught, passionate full-stack web developer specializing in the **MERN** stack. I build scalable applications with **Node.js**, **Express.js**, and databases like **MongoDB**, **MySQL**, and **PostgreSQL**, alongside responsive **React.js** frontends and full-stack **Next.js** projects. Recently, I completed the full web app infrastructure for three organizations, including web servers, websites, and mobile apps. I'm skilled in **IoT** (**Raspberry Pi, NodeMCU**) and currently learning **Go** while diving deeper into **vector databases, RAG.**

## Projects

**Global Community Organization App**
Technologies: Next.js, TypeScript, NextAuth, PostgreSQL, Shadcn/ui.
**Solely developed** a full-stack application from front-end to back-end and database, powering an entire office's operations. Implemented secure user authentication, admin controls, and real-time analytics, managing over **300,000** tree records, **50,000+** child records, and continuously growing data. Supports **80+** employees with daily report generation. Strengthened expertise in end-to-end development and mission-driven solutions. Due to the project's private nature, I cannot share the source code, Blog

**Inventory Management System**
A powerful, full-stack inventory management solution built with modern technologies, focusing on performance and scalability.
Source Code Live

Developed multiple proprietary web projects for organizations and startups over 4 years, leveraging my full-stack expertise. Check out my open-source projects on Github.
